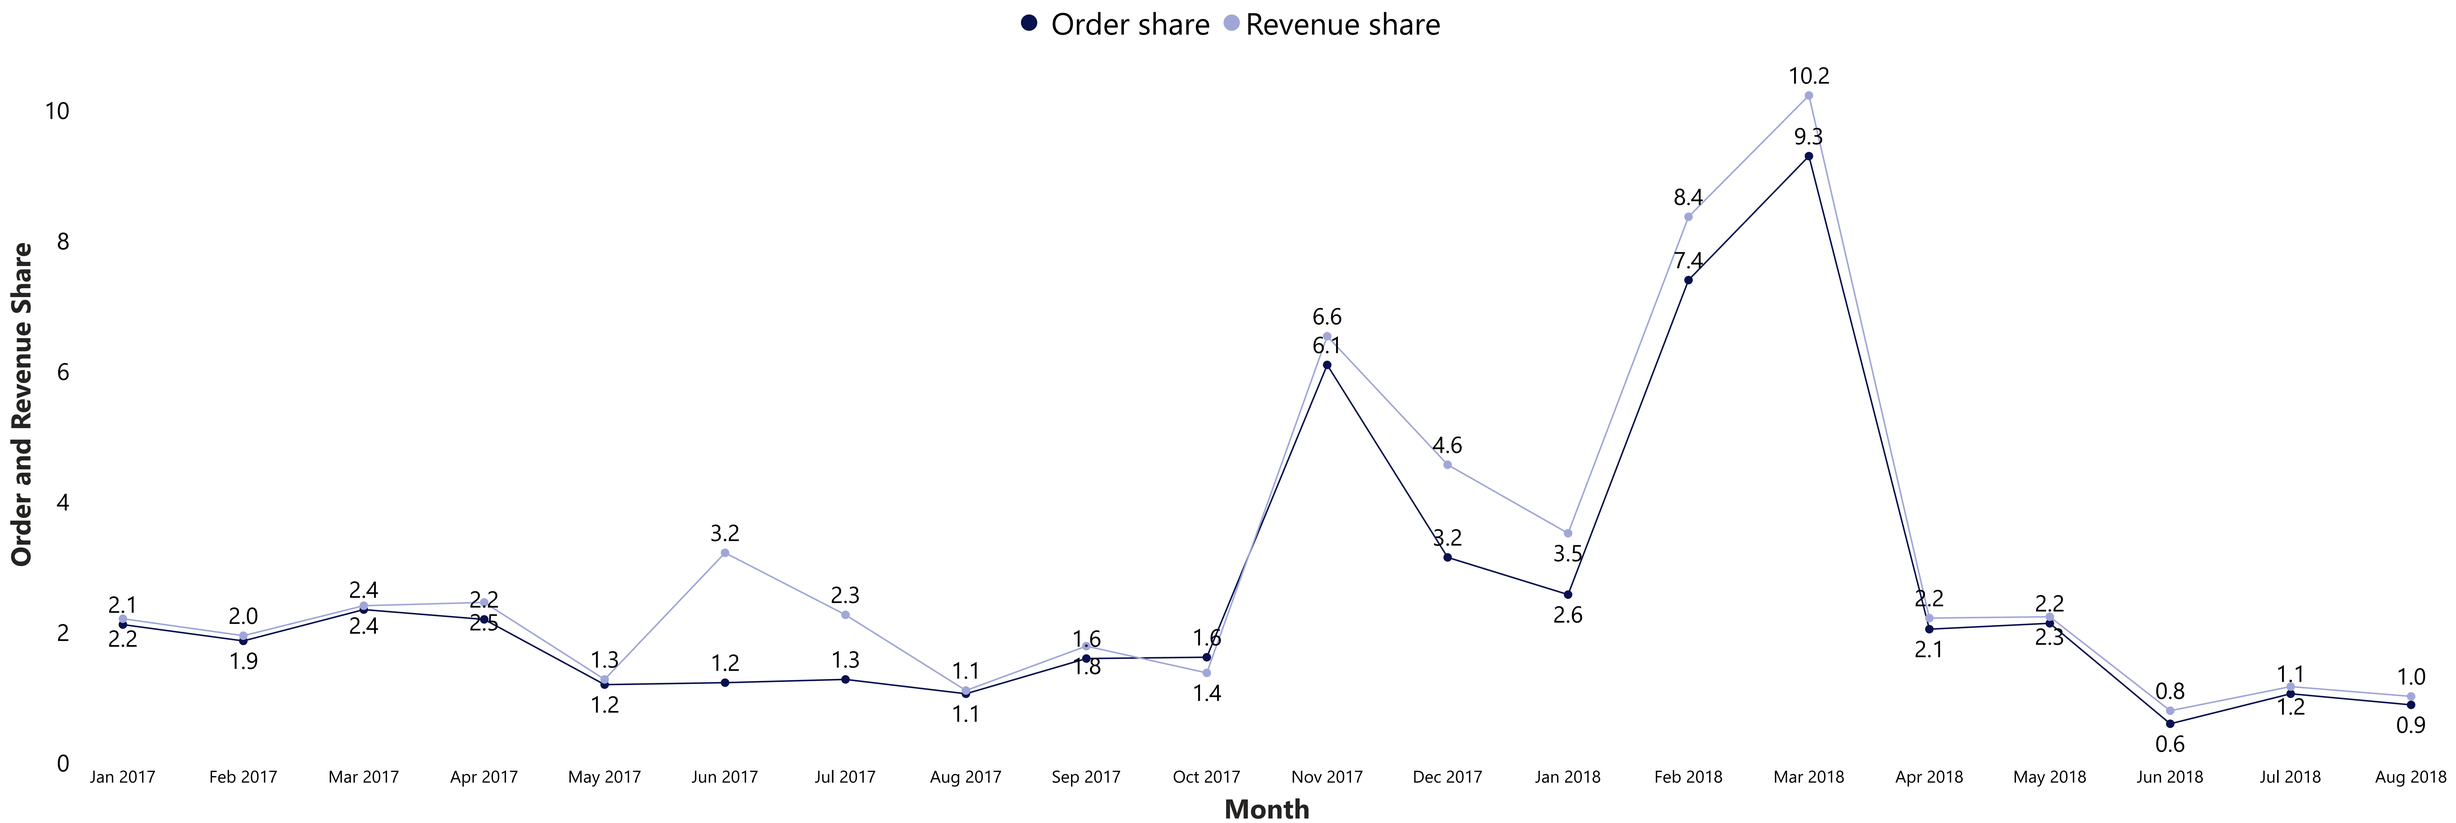
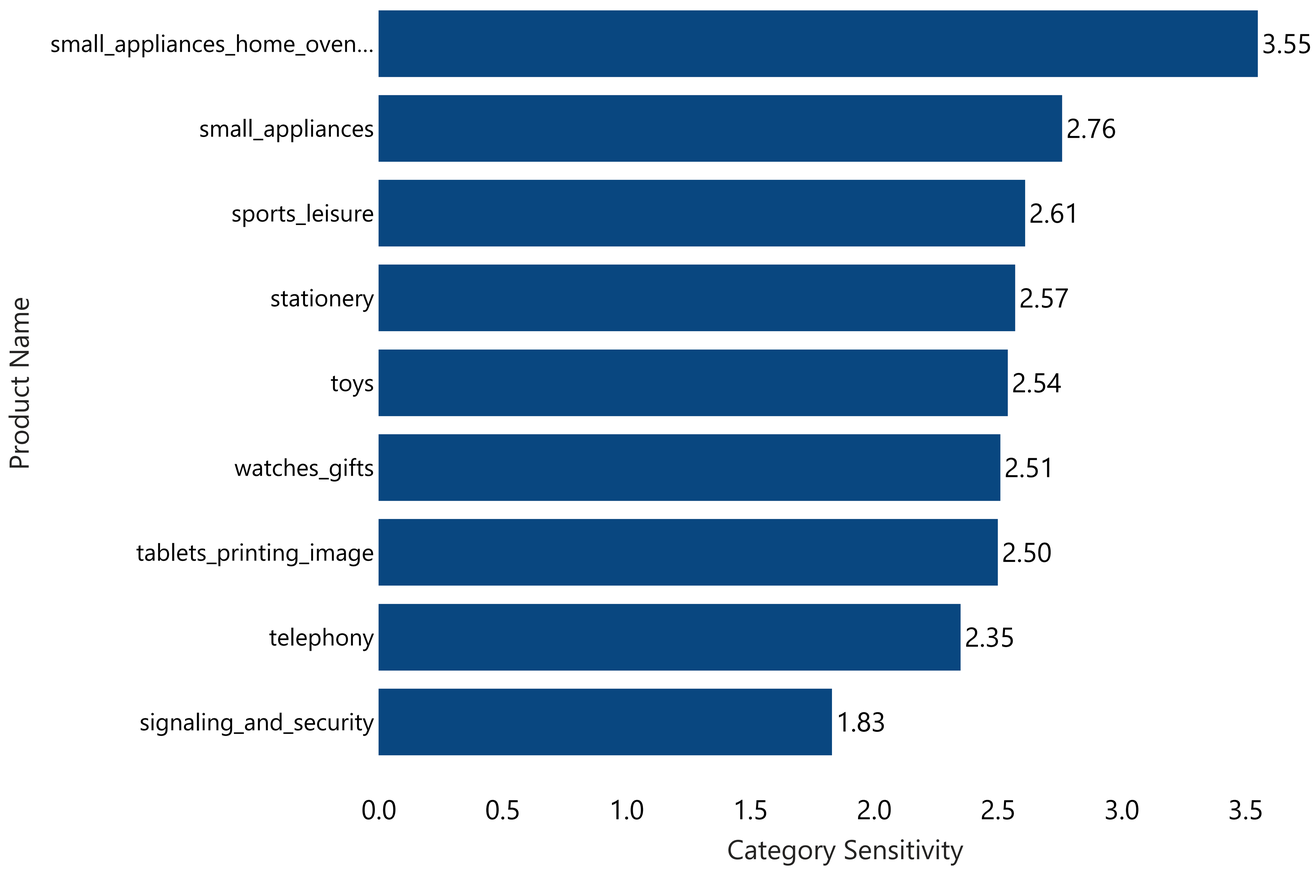
Overall High Delay Rate

High-Delay Order & Revenue Share by Month



Customer Tolerance for Delay by Category & Region

Top Products with Highest Category Sensitivity

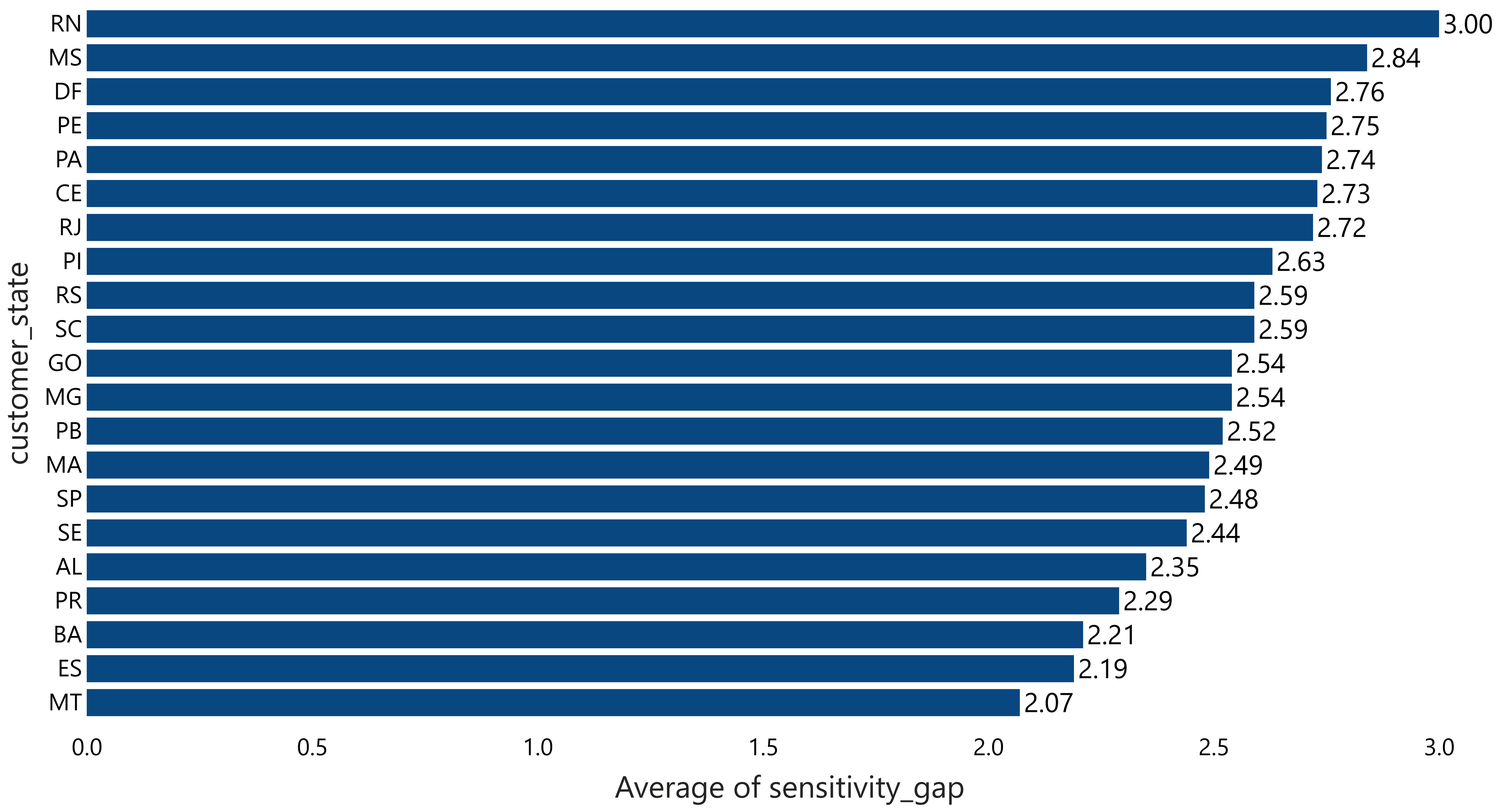


Category sensitivity measure:
3.55

Most delay Sensitive Category:
small_appliances_home_oven_and_coffee

Category Sensitivity is used to measure the drop in average review score when the orders are delivered late (>7 days than estimated). Higher the gap, more sensitive is the category.

Top Categories by State Sensitivity



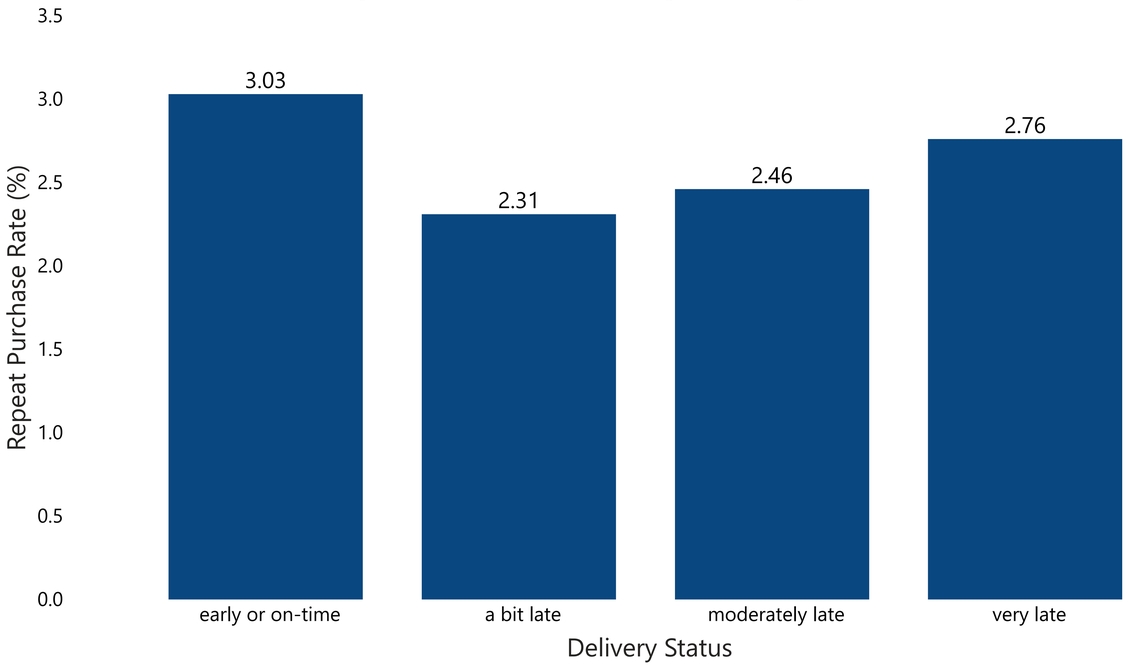
Sensitivity Gap Measure:
3.00

Most Delay Sensitive State:
RN

Measures how much a state's average review score drops when orders are delivered late(>7 days than estimated), compared to on-time delivery.

Repeat Purchase Impact: Does Delay Drive Away Customers?

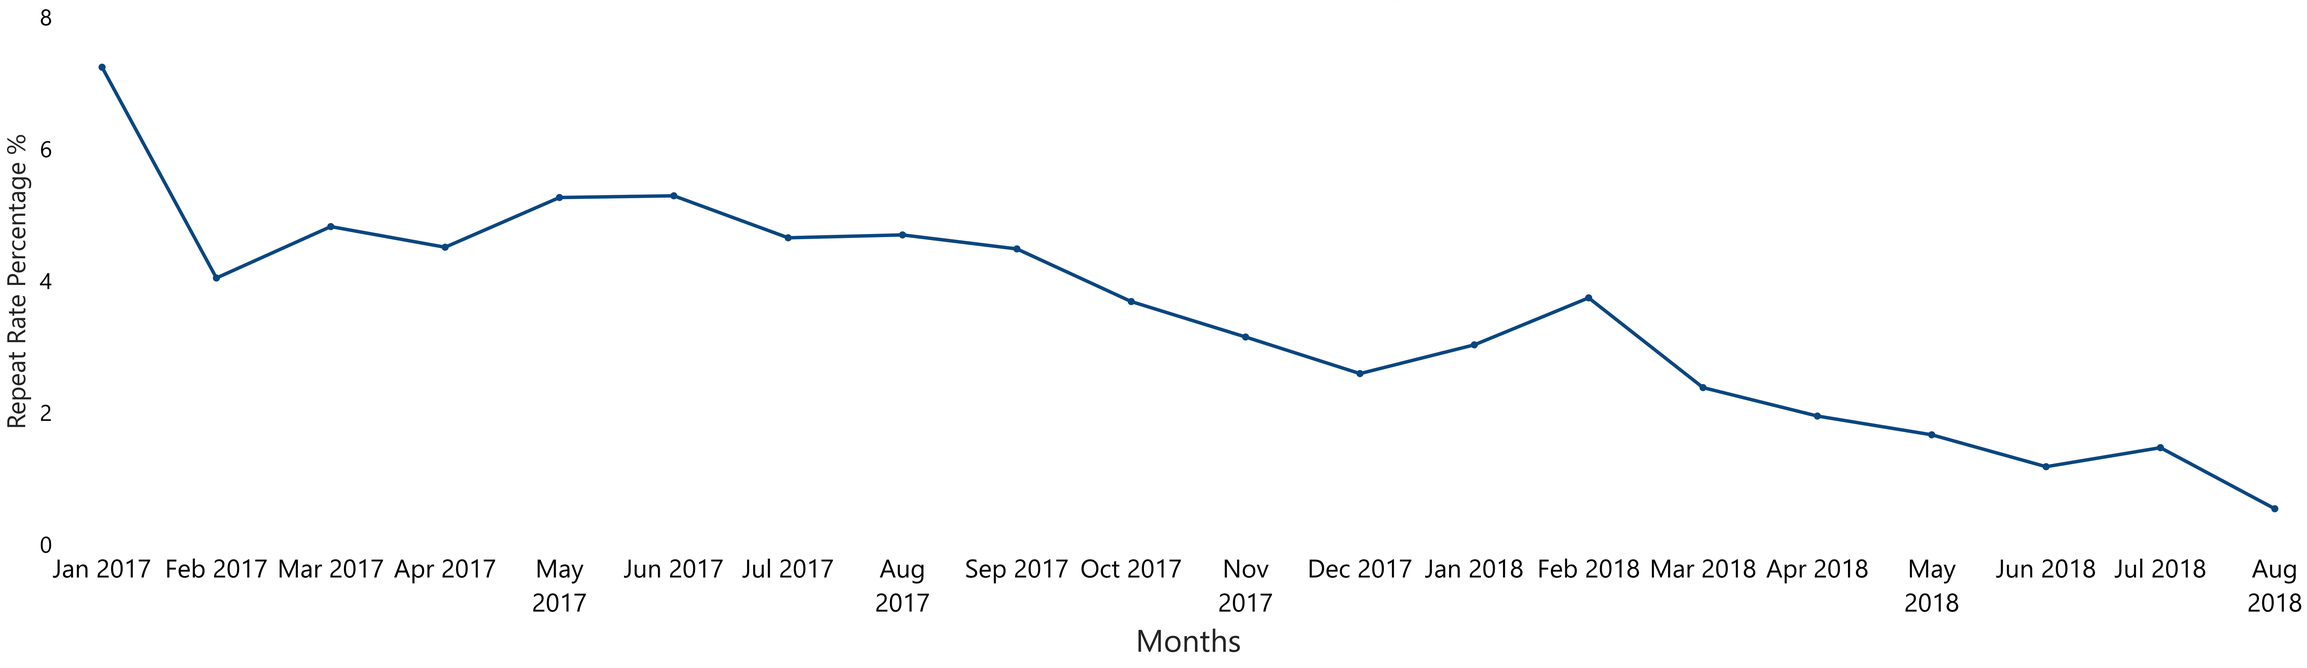
Repeat Purchase Rate by Delivery Status

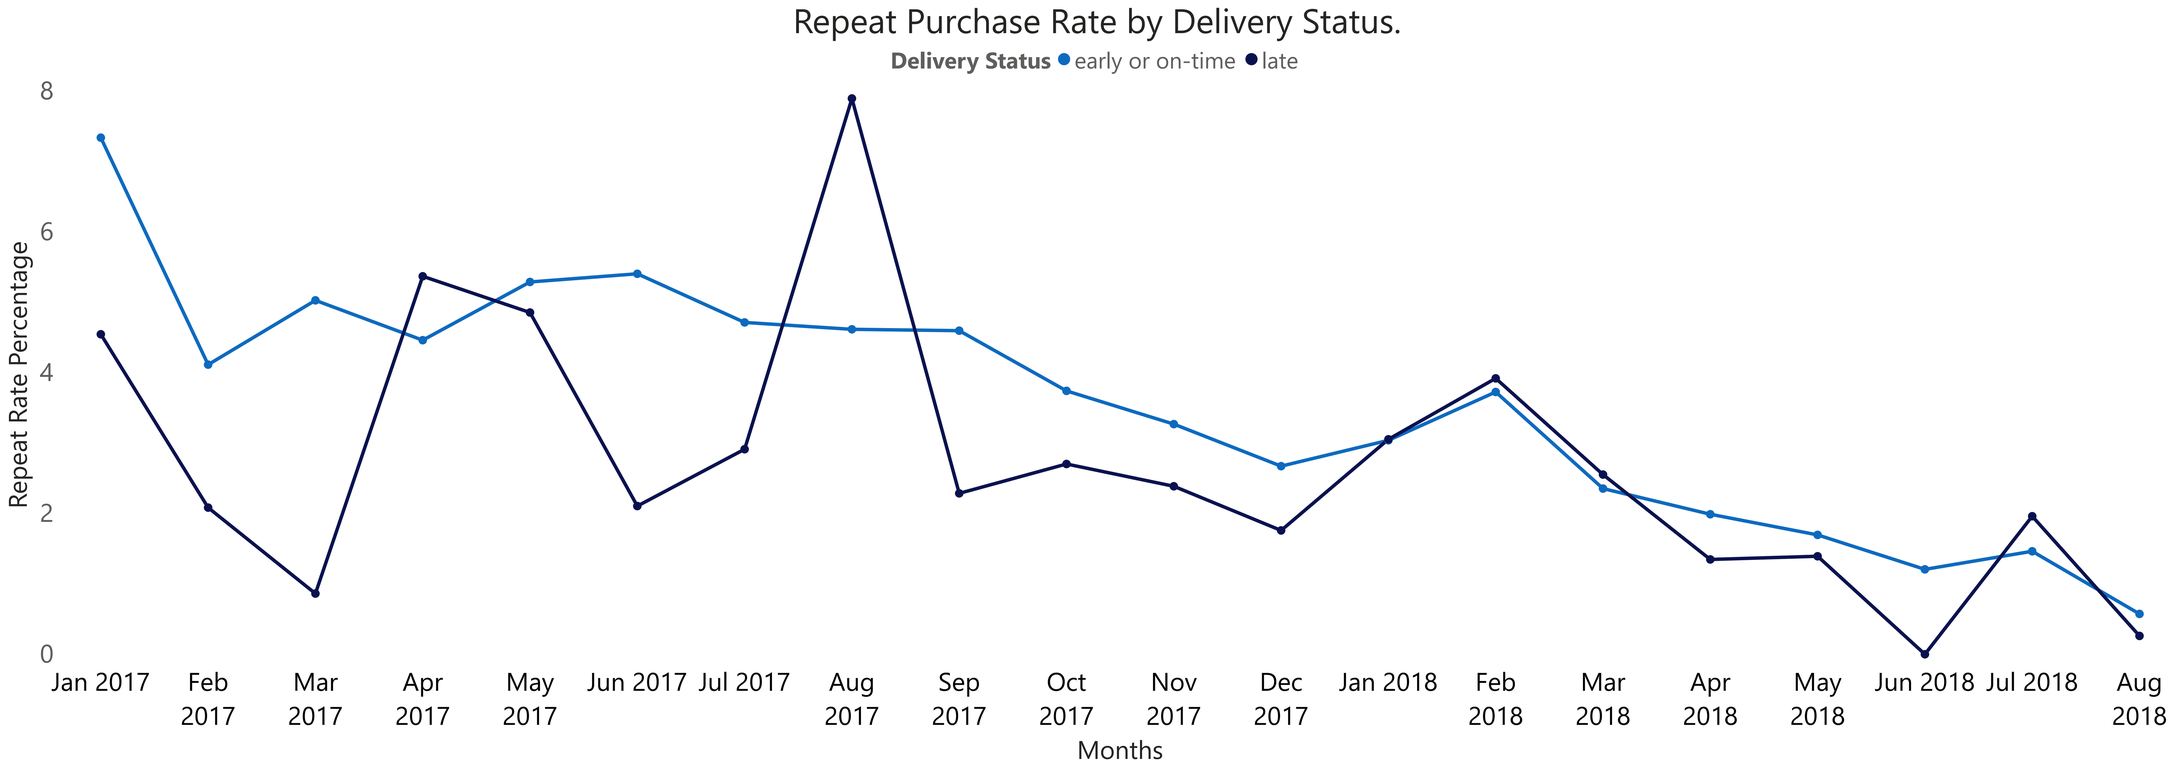


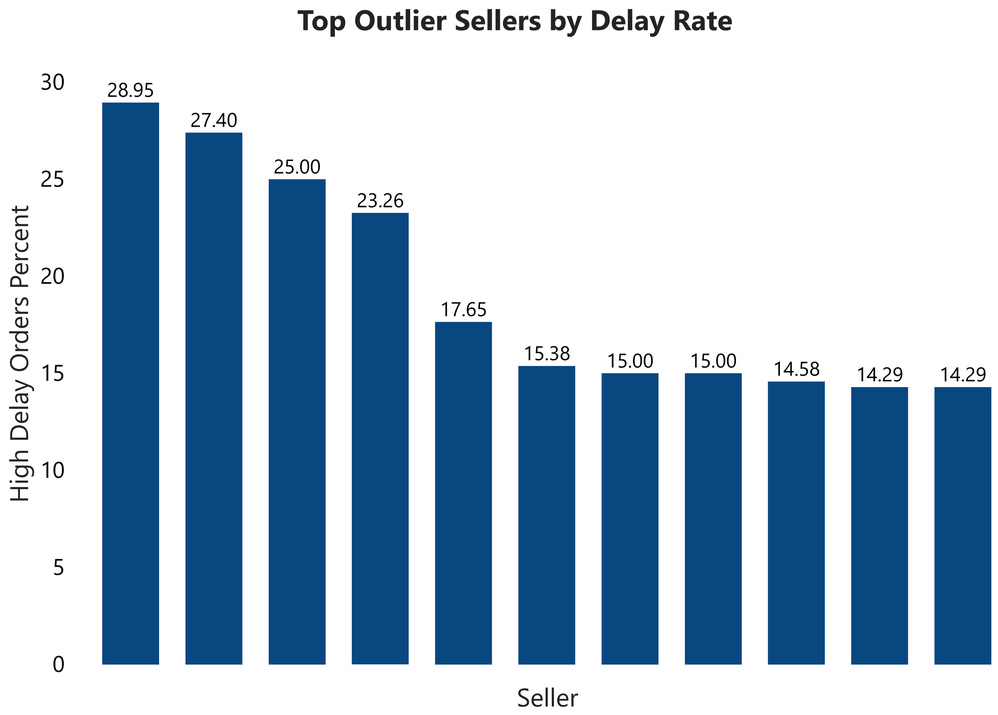
Repeat Purchase Detail Table

Delivery Status	Total Customers	Returned Customers	Repeat Purchase Percent
early or on-time	86993	2639	3.03
a bit late	1819	42	2.31
moderately late	1750	43	2.46
very late	2788	77	2.76

Monthly Return Rate Percentage







Max High Delay Order Percentage:
28.95

Highest Seller Delay Rate: 28.95%
One seller (38 orders) shows a delay rate roughly ten times the platform average with $2,319 of their $8,213 revenue tied to severely delayed orders: a clear candidate for seller performance review.

Delivery Performance by State

Seller State	Total Orders	High Delay Orders Percent	Average Delay	Total Revenue	Average Freight Percentage
AM	3	33.33	9.00	1,258.80	12.48

Average Delivery: 13.7 Days Ahead of Estimate
Across nearly every Brazilian state, orders arrive well before their promised delivery date — suggesting Olist's estimated delivery windows are conservatively padded rather than reflecting actual logistics speed. This likely explains why the vast majority of orders are classified as on-time or early.
